RATIONALE

TRIS Rating affirms the company rating on Double A (1991) PLC (DA) at “BBB-” and the rating on DA’s outstanding senior unsecured debentures at “BBB-”. At the same time, we assign the rating of “BBB-” on DA’s proposed issue of up to Bt2 billion in senior unsecured debentures. The proceeds from the new debentures will mainly be used to repay the debentures due in 2020.

The “BBB-” ratings reflect DA’s position as one of the leading printing & writing (P&W) paper producers in Thailand and the solid brand name of “Double A” products. These strengths are partially offset by the cyclical nature of the pulp and paper industry, stagnant global and domestic demand for P&W paper, as well as ongoing group restructuring.

DA’s operating performance has improved recently. The operating margin (operating income as a percentage of total operating revenues) rose steadily and significantly to 25.9% in the first quarter of 2019, from a low of 4.3% in 2015. FFO (funds from operations) increased to almost Bt4.8 billion in 2018, a record high. Over the next three years, TRIS Rating’s forecast assumes DA’s profits and revenues will drop slightly, but remain firm. The operating margin should range between 17%-22% and FFO should range between Bt2.7-Bt3.6 billion per annum. Total operating revenue should stay above Bt19 billion per annum.

DA’s leverage should increase slightly over the next three years as the company is now developing a new pulp mill using recovered paper (RCP) as raw material. The RCP pulp mill will cost DA approximately Bt900 million. Considering other expenditures including the annual debt repayment, FFO should not be sufficient to cover all the expenditures. DA could liquidate some assets not related to its core operations to be used as another source of cash.

TRIS Rating believes DA will be able to manage liquidity properly. The company has no significant pressure on liquidity this year. However, debentures worth about Bt4.4 billion in total will come due in 2020. DA has to partly refinance the debentures with new ones.

A key financial covenant in DA’s debentures requires the net interest-bearing debt to equity ratio to stay below 2 times. The ratio as of 31 March 2019 was 1.2 times. Thus, the company was in compliance with this key financial covenant. TRIS Rating believes that DA will stay in compliance for the next 12 to 18 months.

RATING OUTLOOK

The “stable” outlook reflects our expectation that DA will maintain its competitiveness in the P&W paper business. The ongoing group restructuring will not affect DA’s financial profile materially and adversely.

RATING SENSITIVITIES

A rating upside could arise if the improvements in earnings performance continue and if the ongoing group restructuring does not lower DA’s cash flow and financial position. In contrast, the ratings and/or outlook could be revised downward if the operating performance, as well as cash flow, fall below expectations or if the capital structure deteriorates more than expected.

According to TRIS Rating’s group rating methodology, the credit profile of the Group and the Group’s members will have an impact on the company rating and the issue ratings of DA.
